

# REBUILDING I-93 SALEM TO MANCHESTER

## INCIDENT MANAGEMENT IMPROVING MOBILITY AND SAVING LIVES

The goals of the Incident Management Program are:

- Minimizing impacts of incidents on travel
- Improving safety at the incident scene
- Reducing the probability of secondary incidents
- Fostering interagency cooperation
- Establishing a sustainable traffic incident management program

Benefits of the program include:

- Reduced vehicle delays
- Enhanced safety to motorists
- Reduced secondary incident frequency
- Improved response and clearance times

The NHDOT has made significant progress in implementing the Incident Management Program:

- Created an internal DOT Work Group
- Created a Technical Steering Committee comprised of local officials
- Coordinated with local and state emergency responders
- Developed detours for road closures resulting from roadway accidents

***Across the nation, Incident Management programs have delivered significant and measurable results.***
